Top side m fit Bottom side m	inish olor	Nonex, PVC smooth, glossy	
fi co Bottom side m	inish olor	smooth, glossy	
Bottom side m	olor		
Bottom side m		white	
	enterial		
	naterial	Ropanol, PUR	
fi	inish	impregnated fabric	
cc	olor	transparent	
Characteristics			
Food Grade (FG) ye	es	EC 1935/2004, EU 10/2011; FDA	
Antistatic (AS) ye	es	ISO 21178	
High conductive (HC)	0		
Flame-retardant (FR) no	0		
ATEX approval no	0		

Technical data						
Hardness	ISO 868	top side	65A	Shore		
Force at 1% elongation (static)	ISO 21181		8	N/mm	45.68	lbs/in.
Thickness	AB method KV.002	total	1.6	mm	0.06	in.
		top cover	0.3	mm	0.01	in.
Weight	AB method KV.004		1.8	kg/m²	0.37	lbs/ft²
Operating temperature	continuous	from / to	-15 / 80	°C	5 / 176	°F
	short	from / to	-15 / 100	°C	5 / 212	°F
Minimum pulley diameter	flexing		20	mm	0.79	in.
	backflexing		50	mm	1.97	in.
Manufacturing width	standard		2020	mm	79.53	in.
	maximum		2020	mm	79.53	in.

Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ. We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts. Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.
