

# Flexam Solid Woven Heavy Duty PVC Belts for Logistics

# High Performance for the Logistics Industry

Solid woven polyester coated with PVC provides excellent tear and impact resistance along with dimensional stability, delivering high performance solutions for today's evolving logistics industry.

## Logistics made better

**Flexam SW** is a premium quality belting product range for the logistics industry.

**Flexam SW** (SW stands for Solid Woven), is a belting type originating out of North America which has become an industry standard.

**Flexam SW** will be available globally at the same Ammeraal Beltech quality you have come to enjoy with our other products.

Six belts are available in different strengths (100, 125 & 150), some with a PVC top cover or A34 profiled cover for inclines. The impregnated carcass without a cover is the most popular belt in our Flexam SW belting range.

*Our SW belt is comprised of a single ply s-weave carcass impregnated with our familiar Flexam PVC formulation.*

## Available finishes

**M2 Matte cover**

**Friction surface**

**A34 Profile cover**

Features	Benefits
Impact, abrasion, cut and tear resistant	Quick & simple belt installation possible with mechanical fastener
Good lace retention properties	Low maintenance & long service life
Flame retardant according ASTM-D378	Less elongation than common conventional PVC belting
High strength belts available	Lower total cost of ownership
Laterally rigid	
Grip profile for steep inclines available

## Haven't Found What You Are Looking For?

Ammeraal Beltech is your global supplier for the best PVC belts in the business. Check out our other product families belonging to our logistics & airport product range:

**FLEXAM EX:** Our EX range is **energy efficient**. EX fabric makes use of a special polyester fibre weave that reduces energy consumption & noise. Minimum elongation makes it easy to track. Not suited however for impact loading.

**FLEXAM IR:** Our Impact Resistant range incorporates the best of both worlds! A true hybrid, the belt's behaviour is much like a Flexam belt in terms of energy efficiency and tracking, however it retains the strength, cut resistance and lateral stiffness characteristics of **Flexam SW**.
